

Computer Expert Witnesses & Laboratory Forensics

Notable Software, Inc. has been providing expert witness support and laboratory forensics for court-related matters since 1998.

Our staff includes experts, litigation support researchers, and forensic investigators. A range of prices can be applied, enabling us to provide cost-effective services.

Tasks have involved defense, plaintiff, and court-appointed expert support in civil, criminal and municipal matters. Experts work directly with the client and legal team in order to help author and respond to discovery requests, prepare filings, create litigation and appeal methods, provide opinion, affidavits and declarations, and testify at depositions and hearings. We also have experience in dealing with the press in order to encourage positive media spin and sway public opinion, as appropriate.

Consultations are available in-person or remotely, via telephone, teleconference and videoconference. Contact us via phone or email to set up an appointment. 1st hour (phone or email only) is free.

Why Do You Need Forensics?

Forensics involves the preparation, review, authentication, and preservation of evidence that will be presented in a civil or criminal case. The government has specific rules for the handling of evidence, which, if not followed precisely, can result in its inadmissibility at trial. As well, forensics experts must be able to attest to their use of scientifically valid and repeatable processes in the work they have performed on the evidence.

Often it is believed that since Information Technology (IT) professionals have the skills to be able to copy servers, drives, directories and files, they are essentially performing the same tasks as a computer forensics expert. This is untrue. Forensics investigations typically require the application of specialized hardware and software that ensure data integrity and provide additional validation checks.

Notable Software's forensics experts have had experience working with state and local law enforcement, Homeland Security, FBI and State Regional Computer Forensic Laboratories, and the National Center for Missing and Exploited Children (NCMEC). Testimony has been presented at local, state and federal levels, including citation in briefs to the U.S. Supreme Court.

Notable Software's Cases

- Class Action Suits
- Contraband
 - Child pornography
 - Trafficking
- Computer Security and Malware
- Damage and Claim Evaluations
- Denial of Service Attacks
- Election Equipment Malfunctions
- Election Recounts
- Endangerment
- Financial Disputes
- Fiduciary Ethics
- Hacking
- Intellectual Property
 - Copyrights
 - Patents
 - Trademarks/Logos
- Legislative Initiatives
- Marital Disputes
- Murder
- Product Liability
- Standards Compliance
- Warranties
- Wiretapping
- Wrongful Firing

Rebecca Mercuri, Ph.D. is the lead forensic expert at Notable Software, Inc., the company she founded in 1981. She holds degrees in Computer Science and Engineering, with a Ph.D. from University of Pennsylvania and post-doctoral work at Harvard University.

Rebecca's high-tech career began at RCA's David Sarnoff Research Center, where she played a key role in the early development of interactive multimedia. Later work was at AT&T Bell Labs, Intel and Merck. Experience spans both hardware and software, with the ability to investigate equipment, application and data design and content. Her forensics specialties are in Criminal Defense and Intellectual Property.

Dr. Mercuri's expertise has been sought by the House Science Committee, U.S. Commission on Civil Rights, Election Assistance Commission, U.K. Cabinet, National Institute of Standards and Technologies, and state and municipal offices. Her findings have contributed to favorable plea offers and settlements.
